

DIFFUSER EYELETS

Diffuser with eyelets in Polycrystal (material from category 1)

There are four types of diffuser

The **DIFFUSER with EYELETS** can be used for ALL lampshade models from 20cm, whatever their shape (ROUND, SQUARE, RECTANGLE or OVAL)

The main function of the diffuser is to mask the bulb(s) in the shade. In addition, the **Polycrystal**, a white, opaline and translucent material that makes up the diffuser, distributes the light over its entire surface to give an even and homogeneous luminosity

We offer three other types of diffuser designed for other shapes of lampshade

TECHNICAL DATA

It is covered with Polycrystal, white and translucent. This material is available in 150 cm width maximum.
