

DIFFUSER HOOKS

Diffuser with hooks in Polycrystal (material from category 1)

There are four types of diffuser

The **DIFFUSER with HOOKS** can be used for ALL lampshade models from 20cm upwards but with a maximum of 60cm, whatever their shape (ROUND, SQUARE, RECTANGLE or OVAL)

The main function of the diffuser is to mask the bulb(s) in the shade. In addition, the **Polycrystal**, a white, opaline and translucent material that makes up the diffuser, distributes the light over its entire surface to give an even and homogeneous luminosity

We offer three other types of diffuser designed for other shapes of lampshade

TECHNICAL DATA

Due to the force exerted by the hooks on the skirting of the lampshade, the maximum diameter is 60cm.

It is covered with Polycrystal, white and translucent
