

FR MONTAGE de l'applique PAROS (hôtellerie)

Cette applique est conçue pour être encastrée dans une tête de lit ou dans un mur.

1. Il faut y prévoir une découpe ronde de Ø68mm pour y placer un boîtier d'encastrement (format standard et profondeur moyenne).
2. Raccordez votre arrivée de courant (230V) au convertisseur (*driver*).
3. Dévissez le petit anneau **C** qui entoure le bas du flexible (près de la plaque décorative). Ensuite dévissez le cache interrupteur **D**, les deux plaques sont dissociées. Pivotez de 90° les deux plaques au niveau du flexible, ce qui permet de fixer la première plaque **A** sur le boîtier d'encastrement
4. L'applique se referme avec la plaque décorative **B**. Revissez l'anneau **C** et le cache-interrupteur **D**.

NL MONTAGE van de wandlamp PAROS (hostellerie)

Deze wandlamp is ontworpen voor inbouw in een hoofdeinde of wand.

1. Er is een ronde uitsnijding van Ø68 mm nodig voor een inbouwdoos (standaardformaat en gemiddelde diepte)
2. Sluit je voeding (230V) aan op de driver.
3. Schroef de kleine ring **C** los die om de onderkant van de flexibel zit (in de buurt van het decoratieve plaatje). Schroef vervolgens de schakelaardekse **D** los, de twee platen komen los van elkaar. Draai de twee platen ter hoogte van de flexibel 90°, zodat de eerste plaat **A** op de inbouwdoos kan worden bevestigd.
4. De wandlamp wordt afgesloten met de decoratieve plaat **B**. Schroef de ring **C** en het schakelaardekse **D** weer vast.

EN MOUNTING of the wall light PAROS (hotel trade)

This wall light is designed to be recessed into a headboard or wall.

1. A round Ø68mm cut-out is required to accommodate a recessed box (standard format and medium depth).
2. Connect your power supply (230V) to the driver.
3. Unscrew the small ring **C** that surrounds the bottom of the flexible (near the decorative plate). Then unscrew the switch cover **D**, the two plates are now separated. Swivel the two plates at the level of the flexible by 90°, allowing the first plate **A** to be fixed to the recessed box.
4. The wall light is closed with the decorative plate **B**. Screw the ring **C** and the switch cover **D** back on.

DE MONTAGE der Wandleuchte PAROS (Hotelgewerbe)

Diese Wandleuchte ist für den Einbau in ein Kopfteil oder in eine Wand konzipiert.

1. Sie benötigen einen runden Ausschnitt von Ø68mm, um eine Unterputzdose (Standardformat und mittlere Tiefe) anzubringen.
2. Schließen Sie Ihre Stromzufuhr (230 V) an den Konverter (*Driver*) an.
3. Schrauben Sie den kleinen Ring **C** ab, der den unteren Teil des Flex umgibt (in der Nähe der Dekorationsplatte). Schrauben Sie anschließend die Schalter-abdeckung **D** ab, die beiden Platten sind voneinander getrennt. Drehen Sie die beiden Platten am Flex um 90°, wodurch die erste Platte **A** an der Unterputzdose befestigt wird.
4. Die Wandleuchte wird mit der dekorativen Platte **B** geschlossen. Schrauben Sie den Ring **C** und die Schalterabdeckung **D** wieder an.

Manufacturer : DAVIDTS LIGHTING – Brussels – Belgium – www.davidts.com

Installation and security instructions (please read and save)

This luminaire is manufactured according to European directives and standards relating to quality and safety of lighting fixtures. A declaration of conformity is available by downloading on our site.

Description of the lighting

Lighting for fixing to the wall or ceiling. More pictures, drawings and complete descriptions are available on our website.

Environmental protection

Our packaging is made from 100% recyclable or re-usable material. For care of the environment please sort or recycle. Fluorescent bulbs and waste electrical equipment should not be disposed of with household waste please take to a recycling facility. This fixture is essentially composed of solid brass. This metal and other elements are fully recyclable. At end of life, if you take the fixture to a recycling facility, each metal will be recovered for new metal production.

Installation of the lighting

This lighting is only intended for indoor use, it must be installed away from moisture, splashing and sources of heat. Suitable for direct mounting on normally flammable surfaces. Before starting the installation, ensure the electrical supply is OFF at the circuit breaker in the consumer unit. Only switching OFF at the wall switch is not adequate. Carefully remove all packaging. All of our fixtures are fixed to the wall or to the ceiling by means of a mounting plate (placement is done by means of screws and dowels, not supplied). Some of our luminaires have more detailed installation instructions (attached to this document). Please read carefully before starting the installation. If you have any doubt about the installation of this lighting, please contact a qualified electrician.

Inserting or replacing a bulb

Always ensure the electrical supply is OFF before this operation. If necessary, let the old bulb to cool for 10 minutes before removing. Place the bulb without forcing into the fitting. Do not directly touch it with the fingers, but with a cloth (fingerprints reduce the lifetime of a bulb). Be always attentive to the choice of a bulb, never exceed the maximum power (W) authorized, indicated on the labels of the light fitting. If an integral LED bulb attached to the fixture is defective, please contact your distributor.

Maintenance of your lighting

Because smoke and dust particles in the air are attracted by a heat source, a deposit will appear on the fixture in the course of time. For maintenance, allow the bulb to cool for at least 10 minutes. Clean the fixture with a paper towel soaked with glass cleaner. Never use solvents, abrasive or corrosive products. Never immerse the fixture in water. If the wires are damaged, they must be replaced by a qualified electrician. This fixture must never be modified as this can make it dangerous to use.
