

## FR MONTAGE de la SUSPENSION TUBES NOURRICE

1. Passez les fils dans le tube A.
2. Vissez ce tube dans le trou fileté de la nourrice.
3. Glissez le tube B dans le tube A en faisant suivre les fils électriques. Pour diminuer la hauteur de la suspension, le tube B peut être raccourci au moyen d'une petite scie à métaux.
4. Ajustez la hauteur de la suspension en serrant la petite vis du tube A à l'aide de la clé Allen qui vous est fournie.
5. Fixez le tube B sur le boîtier C à l'aide de la rondelle éventail, de l'écrou hexagonal et d'une clé ronde de 13mm.
6. Fixez la patère de fixation D au plafond et raccordez le fil de terre à la connexion prévue sur la patère.
7. Raccordez votre arrivée de courant aux connexions électriques de la suspension et fixez le boîtier C sur la patère de fixation D à l'aide des vis latérales.
8. Placez l'abat-jour (avec fixation spéciale) entre les deux pièces de la nourrice.

## NL MONTAGE van de SUSPENSION TUBES NOURRICE

1. Glij de draden door buis A.
2. Schroef buis A in de voorziene schroefdraad van de nourrice.
3. Schuif buis B in buis A en laat de elektrische draden volgen. Om de hoogte van de hanglamp te verminderen kan de buis B dmv een metaalzaagje korter gemaakt worden.
4. Stel de hoogte van de hanglamp in door het schroefje van buis A vast te draaien met behulp van de inbussleutel die werd meegeleverd.
5. Bevestig de buis B aan basis C met behulp van de Grower ring en de hexagonale moer en draai het geheel vast met een ronde sleutel van 13mm.
6. Bevestig haak D tegen het plafond en verbind de aardingsdraad aan de voorziene aansluiting.
7. Verbind de stroomtoegang aan de elektrische aansluitingen van de hanglamp en bevestig basis C op bevestigingsplaat D met behulp van de twee zijschroeven.
8. De lampenkap plaatst zich op deze plaats (een speciale bevestiging dient voorzien te worden in de lampenkap)

## EN MOUNTING of the SUSPENSION TUBES NOURRICE

1. Slide the wires through the tube A.
2. Screw tube A in the provided screw thread in the nourrice.
3. Slide tube B in tube A and let following the electric wires. To adjust the height of the hanging lamp, the tube B can be shortened by means of a metal saw.
4. Set the height of the suspension by fixing the screw of tube A, using the Allen wrench that was included.
5. Attach tube B to base C using the washer and the hexagonal screw and fix everything with a 13 mm round key.
6. Attach fixing plate D against the ceiling and connect the ground wire to the provided connection.
7. Connect the power access to the electrical connections of the suspension and attach base C to the fixing plate D using the two side screws.
8. The lampshade installs itself on this place (a special attachment needs to be provided in the lampshade)

## DE MONTAGE der SUSPENSION TUBES NOURRICE

1. Schieben Sie die Drähte durch Rohr A.
2. Schrauben Sie Rohr A in der Gewindebohrung von die Nourrice.
3. Schieben Sie Rohr B in Rohr A und lassen Sie dem elektrischen Leitungen folgen. Um die Pendelleuchte in der Höhe zu verstellen, können Sie Rohr B mittels einer kleinen Metallsäge einkürzen.
4. Stellen Sie die Höhe von der Pendelleuchte ein durch leichte Befestigung der Schraube von Rohr A, mit dem mitgelieferten Inbusschlüssel.
5. Befestigen Sie die Rohre B an der Basis C mit den Unterlegscheiben, die Sechskantschrauben und mit einem runden 13mm Schlüssel.
6. Befestigen Sie die Montageplatte D an der Decke und schließen Sie die Erdung an die zur Verfügung gestellte Verbindung an der Montageplatte an.
7. Schließen Sie die elektrische Zuleitung an die elektrischen Anschlüsse der Pendelleuchte an und fixieren Sie die Basis C auf der Montageplatte D mit den seitlichen Schrauben.
8. Die Lampenschirm stellt sich an dieser Stelle (im Lampenschirm muss eine spezielle Befestigung vorgesehen werden).

# SUSPENSION TUBES NOURRICE

**Manufacturer : DAVIDTS LIGHTING – Brussels – Belgium – [www.davidts.com](http://www.davidts.com)**

### **Installation and security instructions (please read and save)**

This luminaire is manufactured according to European directives and standards relating to quality and safety of lighting fixtures. A declaration of conformity is available by downloading on our site.

### **Description of the lighting**

Lighting for fixing to the wall or ceiling with handmade lampshade(s) with a soft and pleasant light distribution. More pictures, drawings and complete descriptions are available on our website.

### **Environmental protection**

Our packaging is made from 100% recyclable or re-usable material. For care of the environment please sort or recycle. Fluorescent bulbs and waste electrical equipment should not be disposed of with household waste please take to a recycling facility. This fixture is essentially composed of solid brass. This metal and other elements are fully recyclable. At end of life, if you take the fixture to a recycling facility, each metal will be recovered for new metal production.

### **Installation of the lighting**

This lighting is only intended for indoor use, it must be installed away from moisture, splashing and sources of heat. Suitable for direct mounting on normally flammable surfaces. Before starting the installation, ensure the electrical supply is OFF at the circuit breaker in the consumer unit. Only switching OFF at the wall switch is not adequate.

Carefully remove all packaging. All of our fixtures are fixed to the wall or to the ceiling by means of a mounting plate (placement is done by means of screws and dowels, not supplied). Some of our luminaires have more detailed installation instructions (attached to this document). Please read carefully before starting the installation.

If your light lighting has a fitting with lampshade ring, unscrew it in order to secure the lampshade to the fitting. If the lampshade is made with a seam, make sure that it is positioned towards the back of the light. Screw down the ring carefully. Place the bulb (not supplied) without forcing into the fitting. If necessary straighten the lampshade, only by carefully flexing the metal rods of the lampshade.

If you have any doubt about the installation of this lighting, please contact a qualified electrician.

### **Inserting or replacing a bulb**

Always ensure the electrical supply is OFF before this operation. If necessary, let the old bulb to cool for 10 minutes before removing. Place the bulb without forcing into the fitting. Do not directly touch it with the fingers, but with a cloth (fingerprints reduce the lifetime of a bulb). Be always attentive to the choice of a bulb, never exceed the maximum power (W) authorized, indicated on the labels of the light fitting. If an integral LED bulb attached to the fixture is defective, please contact your distributor.

### **Maintenance of your lampshades**

When your lampshade is dusted use only a brush suitable for delicate fabrics. Never rub the lampshade with a damp cloth or with water. Stains or marks on lampshades can't be removed, attempting removal will risk increasing the surface of the stain. In the case of a disaster, only a new lampshade can recover the original beautiful aspect and clarity of your lighting. To do this please contact your distributor.

### **Maintenance of your lighting**

Because smoke and dust particles in the air are attracted by a heat source, a deposit will appear on the fixture in the course of time. For maintenance, allow the bulb to cool for at least 10 minutes. Clean the fixture with a paper towel soaked with glass cleaner. Never use solvents, abrasive or corrosive products. Never immerse the fixture in water. If the wires are damaged, they must be replaced by a qualified electrician. This fixture must never be modified as this can make it dangerous to use.
