

FR FONCTIONNEMENT du TOUCH DIMMING

- ALLUMER/ETEINDRE : Une pression nette sur le bouton (*sensor*) allume ou éteint le luminaire
- VARIATION: Une pression continue sur le *sensor* permet de varier l'intensité de la lumière. Le *Touch dimming* ne varie que dans une seule direction à la fois (soit augmenter, soit diminuer). Il faut donc relâcher la pression et recommencer pour changer le type de variation.

Important : entre chaque opération il faut retirer le doigt du *sensor* afin de permettre au module de commande (*Touch dimming*) de se réinitialiser.

NL WERKING van de TOUCH DIMMING

- AAN/UIT: een duidelijke druk op de knop (*sensor*) schakelt de verlichting aan of uit
- DIMMEN: Een aanhoudende druk op de *sensor* maakt het mogelijk om de intensiteit van het licht te wijzigen. De *Touch dimming* werkt slechts in één richting tegelijk (verhogen of verlagen). Het is daarom noodzakelijk om de druk los te laten en opnieuw te beginnen om de lichtsterkte te wijzigen.

Belangrijk : tussen elke handeling moet u de vinger van de *sensor* verwijderen om de bedieningsmodule (*Touch dimming*) te kunnen resetten.

EN OPERATION of the TOUCH DIMMING

- ON/OFF : A clear pressure on the button (*sensor*) turns the luminaire on or off
- DIMMING : A continuous pressure on the *sensor* allows to vary the intensity of the light. *Touch dimming* only varies in one direction at the time (either increase or decrease). It is therefore necessary to release the pressure and start again to change the type of variation.

Important : between each operation you must remove the finger from the *sensor* to allow the control module (*Touch dimming*) to reset.

DE BEDIENUNG des TOUCH DIMMING

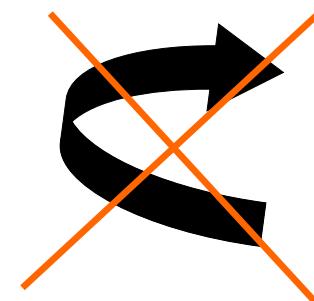

- EIN/AUS: Durch Drücken der Druckknopf (*Sensor*) wird die Leuchte ein- oder ausgeschaltet
- VARIATION: Ein ständiger Druck auf den *Sensor* ermöglicht die Variation der Lichtintensität. Das *Touch dimming* ändert sich nur in eine Richtung (Erhöhe - Abname). Es ist daher erforderlich den Druck abzubauen und erneut zu beginnen, um die Art der Änderung zu ändern.

Wichtig : Sie müssen nach jedem Vorgang den Finger vom *Sensor* entfernen, damit das Steuermodul (*Touch-Dimming*) zurückgesetzt werden kann.

**ONLY TOUCH
THE BUTTON**

**PLEASE
DON'T TURN
THE BUTTON**

TOUCH DIMMING

Manufacturer : DAVIDTS LIGHTING – Brussels – Belgium – www.davidts.com

Installation and security instructions (please read and save)

This luminaire is manufactured according to European directives and standards relating to quality and safety of lighting fixtures. A declaration of conformity is available by downloading on our site.

Description of the lighting

Lighting to place on a table or on the floor. More pictures, drawings and complete descriptions are available on our website.

Environmental protection

Our packaging is made from 100% recyclable or re-usable material. For care of the environment please sort or recycle. Fluorescent bulbs and waste electrical equipment should not be disposed of with household waste please take to a recycling facility. This fixture is essentially composed of solid brass. This metal and other elements are fully recyclable. At end of life, if you take the fixture to a recycling facility, each metal will be recovered for new metal production.

Installation of the lighting

This lighting is only intended for indoor use, it must be installed away from moisture, splashing and sources of heat. Suitable for direct mounting on normally flammable surfaces.

Carefully remove all packaging.

If you have any doubt about the installation of this lighting, please contact a qualified electrician.

Inserting or replacing a bulb

Always ensure the electrical supply is OFF before this operation. If necessary, let the old bulb to cool for 10 minutes before removing. Place the bulb without forcing into the fitting. Do not directly touch it with the fingers, but with a cloth (fingerprints reduce the lifetime of a bulb). Be always attentive to the choice of a bulb, never exceed the maximum power (W) authorized, indicated on the labels of the light fitting. If an integral LED bulb attached to the fixture is defective, please contact your distributor.

Maintenance of your lighting

Because smoke and dust particles in the air are attracted by a heat source, a deposit will appear on the fixture in the course of time. For maintenance, allow the bulb to cool for at least 10 minutes.

Clean the fixture with a paper towel soaked with glass cleaner. Never use solvents, abrasive or corrosive products. Never immerse the fixture in water. If the wires are damaged, they must be replaced by a qualified electrician. This fixture must never be modified as this can make it dangerous to use.
